As a Cloud Technologist, you will be responsible for designing, implementing and managing cloud computing solutions that meet the needs of our clients. This involves working with various cloud platforms such as Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP) and more. Your primary focus will be on ensuring the security, scalability and reliability of these solutions, while also staying up-to-date with the latest trends and technologies in the field.

In this role, you will work closely with cross-functional teams to identify business needs and develop cloud strategies that align with those needs. You will also be responsible for monitoring and optimizing cloud infrastructure, as well as troubleshooting any issues that may arise. Additionally, you will stay up-to-date on industry certifications and training to ensure your skills are current and relevant in the ever-evolving world of cloud technology.

As a Cloud Technologist at Common People, you will have the opportunity to work with cutting-edge technologies and collaborate with a talented team of professionals who share your passion for innovation and excellence. If you are excited about the prospect of shaping the future of cloud
